ABSTRACT

The determination of when a child is ready to enter kindergarten or first grade varies from school district to school district. Currently, many school systems are reevaluating their criteria for school entry. In some school systems, chronological age appears to be the sole criterion; in others, social and learning readiness are also primary considerations. Frequently, educators turn to various testing procedures in order to make an objective determination of readiness. The 113 entries contained in this bibliography, chosen after careful review of items retrieved from a computer search of five large data bases (ERIC, National Technical Information Service (NTIS), Psychological Abstracts, Exceptional Children, and Dissertation Abstracts), should facilitate this process. (Author/RC)

* Documents acquired by ERIC include many informal unpublished *
* materials not available from other sources. ERIC makes every effort *
* to obtain the best copy available. Nevertheless, items of marginal *
* reproducibility are often encountered and this affects the quality *
* of the microfiche and hardcopy reproductions ERIC makes available *
* via the ERIC Document Reproduction Service (EDRS). EDRS is not *
* responsible for the quality of the original document. Reproductions *
* supplied by EDRS are the best that can be made from the original. *

ABSTRACT

The determination of when a child is ready to enter kindergarten or first grade varies from school district to school district. Currently, many school systems are reevaluating their criteria for school entry. In some school systems, chronological age appears to be the sole criterion; in others, social and learning readiness are also primary considerations. Frequently, educators turn to various testing procedures in order to make an objective determination of readiness. The 113 entries contained in this bibliography, chosen after careful review of items retrieved from a computer search of five large data bases in education and psychology, should facilitate this process.

PREFACE

The Educational Resources Information Center (ERIC) is a nationwide information network which acquires, selects, abstracts, stores, retrieves, and disseminates education-related documents and journal articles. Funded by the National Institute of Education of the United States Department of Health, Education, and Welfare, ERIC addresses the needs of the educational community of teachers, researchers, information specialists, and professional organizations by developing a current data base which includes: conference proceedings, instructional programs, manuals, position papers, program descriptions, research and technical reports, literature reviews, and publications which would not be widely disseminated otherwise.

The ERIC Clearinghouse on Tests, Measurement, and Evaluation (ERIC/TM) is one of 16 ERIC clearinghouses located at universities and professional organizations across the country. ERIC/TM's scope of interest includes tests and other measurement devices, evaluation procedures and techniques, applications of testing, measurement and evaluation in educational projects or programs, human development, and learning theory.

Each of the clearinghouses identifies, acquires, and processes documents and journal articles for announcement in one of the two ERIC monthly publications: Resources in Education (RIE) and the Current Index to Journals in Education (CIJE). Clearinghouses also prepare literature reviews, state-of-the-art papers, interpretive reports, and bibliographies in their area of expertise.

ABOUT THE BIBLIOGRAPHY

The determination of when a child is ready to enter kindergarten or first grade varies from school district to school district. Currently, many school systems are reevaluating their criteria for school entry. In some school systems, chronological age appears to be the sole criterion; in others, social and learning readiness are also primary considerations. Frequently, educators turn to various

testing procedures to provide an objective determination of readiness. These procedures, instruments, and related studies form the basis of this bibliography of reports and journal articles.

The items listed here were retrieved in August 1975 through a computer search of five data bases: ERIC (both RIE and CIJE), Psychological Abstracts (PA), National Technical Information Service (NTIS), Exceptional Child Education Abstracts, and Dissertation Abstracts International.

RIE consists of resumes of education related documents and indexes to these resumes. CIJE provides an index to the major educational periodical literature through detailed indexing of articles in approximately 700 education and education related journals. ERIC began collecting information for RIE in 1966 and for CIJE in 1969. At the time of the search the data base contained all material announced in RIE and CIJE through July 1975.

Psychological Abstracts, with a computer searchable data base covering materials announced from 1967 to present, provides summaries of published documents such as technical reports, journals, and monographs in psychology and related disciplines. NTIS, with a data base from 1964 to present, is the central source of reports on technology, science, business, and social science produced by hundreds of federal, state, and local government agencies. Exceptional Child Education Abstracts, the official abstract journal of the Council for Exceptional Children, focuses on the educational problems of the gifted and the physically, mentally, and emotionally handicapped. This computer searchable data base covers material from 1966 to present. Dissertation Abstracts International's computer searchable data base, which includes dissertations from 1967 to the present, is a massive collection of doctoral dissertations, including a majority of those accepted in North America, plus a growing number of papers accepted at institutions abroad.

Bibliographic entries are alphabetically listed by personal or corporate author. With some variation, one of two formats is used: 1) personal or corporate author, title, place of publication, publisher, date, pages, and alternate availability, or 2) personal author, title, journal name, volume, number, part, date, and pages.

Abstracts or annotations of ERIC citations may be found by referring to the corresponding ED and EJ numbers found in RIE and CIJE, while abstracts or annotations of other articles may be located by consulting the other data bases and using the author's name as the point of entry.

When a document is available through the ERIC Document Reproduction Service (EDRS), an ED number appears at the end of the entry. These documents are available in both hard copy (HC) and microfiche (MF) unless otherwise stated.

ERIC microfiche collections are located in the United States and abroad. A complete listing of these collection sites may be obtained from ERIC/TM. An order form containing current price lists for both MF and HC is appended. If a document has been announced in RIE but it is not available through EDRS, the symbol "//" follows the ED number.

An order number appears at the end of entries for materials listed in Dissertation Abstracts International. Documents may be ordered from:

University Microfilms
P. O. Box 1764
Ann Arbor, Michigan 48106

For current prices and ordering information, please refer to a recent issue of Dissertation Abstracts International.

A subject index consisting of ERIC descriptors and identifiers for the entries is appended; subject index numbers refer to the entries. Although ERIC documents and journal articles have an average of 10 to 13 index terms, a maximum of five descriptors and one identifier has been used in this index. Selection of terms was based on several criteria: index terms previously used for the document or journal article, translated into the ERIC language using the ERIC Thesaurus of Descriptors; the major points emphasized in the abstract, annotation, or original work; and, the key words found in the title of the document or journal article. Because we have been selective in choosing subject terms for each citation, users of this bibliography may wish to refer to the original citation in the appropriate data base in order to identify other subject terms used in indexing.

1. PRICE LIST

The prices set forth herein may be changed without notice; however, any price change will be subject to the approval of the National Institute of Education Contracting Officer.

2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to CMIC.

3. REPRODUCTION

Materials supplied hereunder may only be reproduced for not-for-profit educational institutions and organizations; provided however, that express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES

CMIC shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure or delay (a) is due to events beyond the control of CMIC including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments; (b) is due to failure of performance of subcontractors beyond CMIC's control and without negligence on the part of CMIC; or (c) is due to erroneous or incomplete information furnished by Customer.

5. LIABILITY

CMIC's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall CMIC be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. WARRANTY

CMIC MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. QUALITY

CMIC will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of CMIC. Best available copy will be supplied.

8. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of CMIC.

9. DEFAULT AND WAIVER

a. If Customer fails with respect to this or any other agreement with CMIC to pay any invoice when due or to accept any shipment as ordered, CMIC may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

b. No course of conduct nor any delay of CMIC in exercising any right hereunder shall waive any rights of CMIC or modify this Agreement.

10. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.
